

MINSEO KIM

Savoy, IL | minseo5@illinois.edu

EDUCATION

University of Illinois Urbana-Champaign

Aug 2023 – Expected Dec 2028

B.S. in Computer Engineering; Minor in Entrepreneurship

Urbana-Champaign, IL

Relevant Coursework: Introduction to Electronics, Introduction to Computing, Computer Systems & Programming, Linear Algebra with Computational Applications

Current Coursework: Differential Equations, Thermodynamics, Thermal Physics, Quantum Physics

PROJECTS

BlockBoard | Local-First AI Dashboard

2026 – Present

- Built a local-first visual workspace where users arrange AI chat, task, data, map, and code blocks on a shared React Flow canvas.
- Integrated tool calling across Ollama, OpenAI, Anthropic, and Google, using Zod validation and approval gates to prevent invalid or destructive data changes.
- Built the desktop and web stack with TypeScript, React, Zustand, Tauri, and Rust; maintained 380+ automated tests across the TypeScript and Rust codebases.

Harness IDE | LLM Agent Harness Prototype

2026 – Present

- Building a visual testbed for configuring, testing, and evaluating LLM agent harnesses across local and hosted models.
- Designing experiments to compare UUID, semantic-ID, and schema-constrained approaches for reliable UI object referencing.

ACTIVITIES

Korean Engineering and Science Society (KESS) | Member

Sep 2023 – May 2024

- Built an image classifier to distinguish a scale model of a library from a human figure; demonstrated the project at UIUC Engineering Open House (EOH).
- Reviewed and discussed AI research papers, including work on deepfake detection.

ACM @ UIUC – Agent Fan Club | Member

Aug 2026 – Present

EXPERIENCE

Republic of Korea Army | Signals Intelligence Operator

Oct 2024 – Apr 2026

- Supported 24/7 operations through rotating shifts and structured handoffs in a high-security environment.
- Coordinated with incoming and outgoing shifts while following strict operational and security procedures.

SKILLS

Programming: TypeScript, JavaScript, Python, C, C++, Java, Rust, HTML/CSS

Frameworks & Tools: React, Tauri, React Flow, Zustand, Tailwind CSS, Vite, Git

AI & Data: Ollama, LLM tool calling, OpenAI/Anthropic/Google APIs, scikit-learn, NumPy, Pandas, Matplotlib

Languages: Korean (native), English (proficient), Chinese (intermediate)
